FAILURE TO MONITOR**

**ESTE INFORME CONTIENE INFORMACIÓN IMPORTANTE ACERCA DE SU AGUA POTABLE. HAGA QUE

**Monitoring Requirements Not Met for Southwest Warren County Municipal Authority**

Our water system violated one or more drinking water standards over the past year. Even though these were not emergencies, as our customers, you have a right to know what happened and what we did to correct these situations.

*We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During December 2025 we failed to monitor for the following contaminants and therefore cannot be sure of the quality of our drinking water during that time.*

**What should I do?**

There is nothing you need to do at this time.

The table below lists the contaminant(s) we did not properly test for during the last year, the required sampling frequency, how many samples we took, when samples should have been taken, and the date on which corrective action samples were (or will be) taken.

Contaminant	Required sampling frequency	Number of samples taken	When all samples should have been taken	When samples were or will be taken
HAA5	2	1	December 7 <sup>th</sup> 2025	December 23 <sup>rd</sup> 2025

**What happened? What was done? When will it be resolved?**

One of the two samples collected on December 7<sup>th</sup> 2025 was rejected by the accredited laboratory, this sample was recollected on December 23<sup>rd</sup> 2025 causing the collection to be outside the required sampling date.
